

Explanatory Material [SRC_BAPIv2.2_DATAELEMENT_OUTPUT_E]

1. Function Overview

Use UiPath.SAP.BAPI.Activity2.2.0 or later to output SAP table element information to an Excel file.

2. Function Diagram

3. How to use

The input contents of Argument File are as follows.
(Please input all Argument File as String)

<Input>

Argument Name	Type	Description	Required
in_TableName	String	Table name for element extraction	Yes
in_OutPath	String	Output file save destination and file name (Set the relative path or complete path.)	Yes
in_OutFileName	String	Output file name	Yes
in_AppServer	String	Application server address for SAP connection	Yes
in_Client	String	Client information for SAP connection	Yes
in_Language	String	SAP connection language(EN : English , JA : Japanese)	Yes
in_Password	SecureString	SAP Logon Password	Yes
in_SystemNumber	String	System number for SAP connection	Yes
in_User	String	SAP Logon User	Yes
in_FunctionXmlFilePath	String	File path of SRC_RFC_READ_TABLE.xml or SRC_BBP_RFC_READ_TABLE.xml for data extraction(Set the relative path or complete path)	Yes

About output files

Execute this function and input table data extraction conditions to the output DATAELEMENT_table name.xlsx.

	A	B	C	D	E	F	G	H
1	MARA		Length total	2376				
2	FIELDNAME	KEYFLAG	DATATYPE	LENG	DDTEXT	Equation	From	To
3	MANDT	X	CLNT	3	Client			
4	MATNR	X	CHAR	40	Material Number			
5	ERSDA		DATS	8	Created On			
6	ERNAM		CHAR	12	Name of Person who Created the Object			
7	LAEDA		DATS	8	Date of Last Change			
8	AENAM		CHAR	12	Name of person who changed object			
9	VPSTA		CHAR	15	Maintenance status of complete material			
10	PSTAT		CHAR	15	Maintenance status			
11	LVORM		CHAR	1	Flag Material for Deletion at Client Level			
12	MTART		CHAR	4	Material type			
13	MBRSH		CHAR	1	Industry Sector			
14	MATKL		CHAR	9	Material Group			

About Length total:

When extracting table data using SRC_BAPI2.2_TABLEDATA_OUTPUT, "Function module: RFC_READ_TABLE" is used.
This function module can only output up to 512 output length.
Therefore, delete unnecessary fields so that "Length total" is 512 or less.
(If deleting, delete the line)

About Equation

Data is extracted as blank: = (equal).

Ex: Table = MARA

	Equation	From	To
MATNR		100000	

MATNR = "100000" data will be extracted.

	Equation	From	To
MATNR			100000

MATNR >= "100000" data will be extracted.

	Equation	From	To
MATNR		100000	200000

MATNR <= "100000" AND >= "200000" data will be extracted.

<> : Different than input value will be extracted.

	Equation	From	To
MTART	<>	ROW	

MTART extracts data different than ROW.

* : You can enter input conditions.

	Equation	From	To
MTART	*	(MTART = "ROW" or MTART = "FERT")	

MTART extracts data for "ROW" or "FERT".

If you enter more than one condition, it becomes an AND condition.

	Equation	From	To
MATNR		100000	100200
MTART	<>	ROW	

MTART extracts data different than "ROW" and MATNR extracts data between "100000" to "100200".

4. Important Notes

- Save it in the SRC_Common folder.
- The Workflow Template provided in "Common Reusable Components" of UiPath Connect Marketplace, saved in the "SRC_Common" folder, when using UiPath Reusable Component for SAP ERP, you must save it together.
