

Explanatory Material [SRC_BAPIv2.2_TABLEDATA_OUTPUT_E]

1. Function Overview

Outputs SAP table data to a CSV file.

2. Function Diagram

3. How to use

The input contents of Argument File are as follows.
(Please input all Argument File as String)

<Input>

Argument Name	Type	Description	Required
in_ExcelDataFilePath	String	Destination of the file (DATAELEMENT_table name.xlsx(*1)) where the extraction conditions are entered.	Yes
in_OutPath	String	Output file save destination and file name (Set the relative path or complete path.) * If this item has a file path, a CSV file will be output. (If there is no input, it will be output to the data table.)	Conditional
in_OutFileName	String	Output file name * If in_OutPath has a value, be sure to enter this item.	Conditional
in_AppServer	String	Application server address for SAP connection.	Yes
in_Client	String	Client information for SAP connection.	Yes
in_Language	String	SAP connection language. (EN : English , JA : Japanese)	Yes
in_Password	SecureString	SAP Logon Password	Yes
in_SystemNumber	String	System number for SAP connection.	Yes
in_User	String	SAP Logon User	Yes
in_AddInformationFlg	String	Whether "DDTEXT", "DATATYPE", "LENG" is entered in the header line of the criteria input file X : Displayed Other than X : Not Displayed	
in_FunctionXamlFilePath	String	File path of SRC_RFC_READ_TABLE.xml or SRC_BBP_RFC_READ_TABLE.xml for data extraction.(Set the relative path or complete path)	Yes

(For in_OutPath and in_OutFileName, mandatory check was performed in the previous version, but since the output function to the data table has been added, the mandatory check is not performed.)

<Output>

Argument Name	Type	Description
out_dt_TableData	DataTable	Output extraction results to data table.

4. Important Notes

- Save it in the SRC_Common folder.
- The Workflow Template provided in "Common Reusable Components" of UiPath Connect Marketplace, saved in the "SRC_Common" folder, when using UiPath Reusable Component for SAP ERP, you must save it together.
- Assuming that Sample_SRC_TABLEDATA_OUTPUT.xml saved in (*1)Sample Files is used, the file name where the extraction conditions are input is described as "DATAELEMENT_table name.xlsx".
- Please refer to the description of document_SRC_BAPI2.2_DATAELEMENT_OUTPUT_E for how to enter extraction conditions in "DATAELEMENT_table name.xlsx".
