

Explanatory Material [SRC_BAPIv2.2_VAL_TBL_EXPORT_E]

1. Function Overview

Extract data from SAP Table: T006/T006A (Unit of Measure Table) and save it to an Excel file in a format that can be used in SRC_INPUT_FILE_VAL_CNV_E.
(In order to create data using BAPI, the Unit of Measure must be created in the internal unit of measure.)

2. Function Diagram

3. How to Use

The following Argument information must be entered in Argument File.

<Input>

Property	Type	Description	Required
in_SAPService	UiPath.SAP.BAPI.Connection.Service	SAP Server information	Yes
in_FilePath	String	Export File save destination and file name (Set a relative or full path.)	Yes
in_LanguageKey	String	Table: T006A maintains information for each language, so that data is not retrieved in duplicate, specifying the extraction language	Yes

4. Reference

The input contents of Argument File are as follows.

Property	Description	Required
ExportFilePath	Export File save destination and file name (Set a relative or full path.)	Yes
LanguageKey	Table: T006A holds information for each language, so specify the extraction language so that duplicate data is not acquired.	Yes
AppServer	SAP Application Server information.	Yes
Client	Client information for SAP connection	Yes
SystemNumber	3-character system ID of the SAP system	Yes
Language	SAP connection language (EN: English, JA: Japanese)	Yes

5. Important Notes

- Do not start Excel when executing.
- The Workflow Template provided in "Common Reusable Components" of UiPath Connect Marketplace, saved in the "SRC_Common" folder, when using UiPath Reusable Component for SAP ERP, you must save it together.
