

Explanatory Material [SRC_SetGridValues]

1. Function Overview

General registration operations such as text boxes and combo boxes required for the workflow for registering data from the GUI.
It is assumed that it will be used in calls from other workflows.

2. Function Diagram

* Function Overview

1. If "#SKIP#" is entered in Input File, the item is skipped (if the initial value is displayed from the master, etc., the master item is entered without being deleted).
2. Based on the selector information of the item to be processed, input control judgment of text box, combo box, check box and radio button is performed.

3. How to Use

<Input>

Argument Name	Type	Description	Required
in_TargetSelector	DataRow	Selector information of items to be processed.	Yes
in_TargetValue	DataRow[]	Value to be registered in the item to be processed.	Yes
in_NullException	Boolean	Used when in_TargetSelector information does not exist on the screen, but should not be Exception (Ex :Organization information items differ depending on the view to be selected when registering the material master. If invalid organization information is entered in the data file, it is not an exception and only the required views are selected and used to move to the next screen.)	
in_StartIndex	Int32	Start Index.	Yes
in_EndIndex	Int32	End Index.	Yes
in_DelayTime	Int32	Wait time before and after input of items to process.	

<Output>

Argument Name	Type	Description
out_dt_Selectors	DataTable	Selector information of grid to process.

4. Important Notes

- Save it in the SRC_Common folder.
- The selector information specified in Grid (selector information specified in in_TargetSelector) must be a selector that uses [X, Y].

* Correct example

```
<wnd app='saplogon.exe' /> <sap id='usr/tblAAAA/ctxtBBBB[0,0]' />  
<wnd app='saplogon.exe' /> <sap id='usr/tblAAAA/ctxtBBBB[0,4]' />
```

* Incorrect example

```
<wnd app='saplogon.exe' /> <sap id='usr/tblAAAA/' tableCol='0' tableRow='0' />  
<wnd app='saplogon.exe' /> <sap id='usr/tblAAAA/' tableCol='4' tableRow='0' />
```
