

[Sample_SRC_BAPIv2.2_JOBLOG_EXPORT_E] Explanatory Material

1. Overview

Search the job log from the search conditions described in the Excel file

2. Function Image Overview

3. How to Use

Overview

Registration is performed by executing Sample_SRC_BAPIv2.2_JOBLOG_EXPORT_E.xml after inputting in Argument File and Input_Output File the extraction condition of the job result to be output.

Information for SAP connection information must be entered in the Argument File.
(Please input all Argument File as String)

<Input>

Property	Description	Required
in_InputFilePath	Save destination and file name of Input File (Sample file) (Set a relative path or full path.)	yes
in_AppServer	Application server address for SAP connection	yes
in_Client	Client information for SAP connection	yes
in_Language	SAP connection language (EN: English, JA: Japanese)	yes
in_SystemNumber	System number for SAP connection	yes

How to input extraction conditions (How to describe Input_Output File)

Enter job search conditions in the following format.

Field Name	Keyword/Flag	Remarks
Job Name	Enter job name	Job Name
User Name	Enter username	User Name
Sched	Enter "x"	Job status-"planned"
Released	Enter "x"	Job status-"Released"
Ready	Enter "x"	Job status-"Waiting"
Active	Enter "x"	Job status-"Running"
Finished	Enter "x"	Job status-"Exit"
Canceled	Enter "x"	Job status-"Cancel"
From Date	Enter format yyyyMMdd	Job start condition-start date
To Date	Enter format yyyyMMdd	Job start condition-end date
From Time	Enter format HHmmss	Job start condition-start time
To Time	Enter format HHmmss	Job start condition-end time

About search results

The search results are saved in a separate worksheet in the Input_Output File (sample-input.xlsx) that describes the search conditions.
The job summary is saved in the "Job_Overview" worksheet, and the spool information is saved in "List_of_Spool_Requests".

5. Important

- Do not start Excel when executing.
- Specify "Input" as the worksheet name for inputting extraction conditions to Input_Output File.
- Do not change the item names and item order listed in the Input_Output File.
- The Workflow Template provided in the "Common Reusable Components" of UiPath Connect Marketplace Must be saved together when using the UiPath Reusable Component for SAP ERP.
