

[SRC_DEFINE_JOB_E] Explanatory Material

1. Overview

Perform job registration from Transaction code : SM36

2. Function Image Overview

3. How to Use

Registration is performed by entering the start conditions and steps of the job you want to register in Input File and executing Workflow.

The following Argument information must be entered in Argument File.
(Please input all Argument File as String)

<Input>

Property	Description	Required
InputFilePath	Input data file path (Set a relative or full path.)	yes
SelectorFilePath	Selector data file path (Set a relative or full path.)	yes
ResourceFilePath	Resource data file path (Set a relative or full path.)	yes
ScreenshotsFolderPath	Error screenshot folder path (Set a relative or full path)	yes
LogFolderPath	Log folder path (Set a relative or full path.)	yes
LogFileName	Log file name (Current Timestamp will be added in the filename. Ex: 190722_114045_SRC_Result.log)	yes

About input files

Input data is written in an Excel file.
Enter the job start condition in the [StartCondition] worksheet and the step in the [Step] worksheet.
Check the sample file for the contents of the input data.

About processing results

The search results are saved in a separate worksheet [SRC_Log] in an Excel file containing the search conditions.

4. Important

- Do not start Excel when executing.
- Code display are required for items in the drop-down list. Select "Show keys within dropdown list" in GUI Interactive Design settings.
- Workflow Template saved in "SRC_Common" folder provided by "Common Reusable Components" of UiPath Connect Marketplace, must be saved together when using UiPath Reusable Component for SAP ERP.
- Must be logged in SAP and the screen displayed.
