To Date	Enter format yyyyMMdd	Job start condition-end date
From Time	Enter format HHmmss	Job start condition-start time
To Time	Enter format HHmmss	Job start condition-end time

About search results

The search results are saved in a separate worksheet in the Input_Output File (sample-input.xlsx) that describes the search conditions.
The job summary is saved in the "Job_Overview" worksheet, and the spool information is saved in "List_of_Spool_Requests".

4. Important

- Do not start Excel when executing.
- Specify "Input" as the worksheet name for inputting extraction conditions to Input_Output File.
- Do not change the item names and item order listed in the Input_Output File.
- Workflow Template saved in "SRC_Common" folder provided by "Common Reusable Components" of UiPath Connect Marketplace, must be saved together when using UiPath Reusable Component for SAP ERP.
