

## [SRC PAYMENT RUN\_E] Explanatory Material

### 1. Overview

Execute the payment processing from Transaction Code: F110.

### 2. Concept of the reusable component

### 3. How to use

It is necessary that the following Argument information is inputted in Argument File.  
(Please input all Argument File as String)

[ Input ]

| Property Name          | Description                                                                                                                                                         | Required Input |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| InputFilePath          | Input File save destination and file name (Set the relative path or complete path.)                                                                                 | Yes            |
| SelectorFilePath       | Selector data file save destination and file name (Set a relative or complete path.)                                                                                | Yes            |
| ResourceFilePath       | Resource data file save destination and file name (Set a relative or complete path.)                                                                                | Yes            |
| ScreenshotsFolderPath  | Error screenshot file save location and file name (Set the relative path or complete path.)                                                                         | Yes            |
| LogFolderPath          | Log data file save destination (Set a relative or complete path.)                                                                                                   | Yes            |
| LogFileName            | Log data file name<br>(The time stamp is added to the beginning of the file name.<br>Example: 190722_114045_SRC_Result.log)                                         | Yes            |
| ProposalExportFilePath | File path to output payment proposal results.<br>Example : SRC_PAYMENT_RUN#Data#PaymentResult_{0}_{1}.xlsx<br>( "{0}" is execution date, "{1}" is change to the ID) | Yes            |
| OverwriteFlag          | If the export file already exists, it will be overwritten.                                                                                                          |                |

### 4. Notes

- Do not start Excel when executing.
- Code display are required for items in the drop-down list. Select "Show keys within dropdown list" in GUI Interactive Design settings.
- The Workflow Template provided in the "Common Reusable Components" of UiPath Connect Marketplace Must be saved together when using the UiPath Reusable Component for SAP ERP.
- Log on to SAP and display the screen.
